

WHY IT CAREERS?

Think of all the challenges facing your community - and the world. The solution to every single one of them involves technological know-how. You can help solve these problems... but only if you have the skills and training.

WHAT'S DIFFERENT ABOUT IT CAREERS?

- Schooling is relatively short
- Jobs are plentiful
- Pay and benefits are good
- Flexible hours
- Work can benefit others
- A supportive, team environment

WHY IT CLASSES?

Most employers need employees who are comfortable with technology. Our IT classes are designed for every day folks - not just computer geeks. We also know that a lot of people who'd like to take IT classes already have jobs and families... So our courses are designed with your priorities in mind.
